

AUSTRIA

Overweight in adults, adolescents and children is very high, but adult rates are the lowest in the EU; agriculture is characterised by low pressure on freshwater resources due to agriculture, high participation of women in farming and high expenditures in R&D; food waste at the end-user level is still high, but a national strategy is in place to tackle the phenomenon.

FOOD SUSTAINABILITY INDEX PERFORMANCE

COUNTRY SCORE

NUTRITIONAL CHALLENGES

81 years life expectancy at birth

71 years healthy life expectancy

54% of adults are overweight

27% of children and adolescents are overweight

70% of the population reaches recommended physical activity levels

12% of calories from sugar

3.95 g of sodium per day

Food-based dietary guidelines are published on a national level

AGRICULTURE

0.1% of renewable water used in agriculture

1.6% of average soil organic carbon (content in weight)

263,484 ha are deforested each year

2.54 ton CO₂ eq. per ha are GHG emissions from agriculture

3.09% of GDP government expenditure on R&D

48 years average age of farmers

4% of youth (under 35) works in agriculture

55.9% of farmers are women

FOOD LOSS AND WASTE

74 kg/yr per capita food waste

Strategies: 2016 Food Waste Management Plan
